Comments; Appendix B, Water Quality

Hi Carol,

Once my field season is over I will no longer continue to be a day late and a dollar short-it's sad to say that when I don't have computer access communication lines seem inefficient. I apologize for not getting back to you by last Friday-I just wanted to confirm that we didn't have any major comments. It has been difficult for reviewers to offer too many detailed comments when things are operating at a programmatic level. The only comment which may be of merit was the consideration of inclusion of a second method to the second action under Water Treatment, as follows:

Action

Improve TOC, pathogens, turbidity and bromides at domestic water supply intakes.

INCLUDE:

Method

Reduce Delta Island discharges that are high in TOC or other compounds that may impact source water quality.

Thanks.
